and a second card feeder (optional)

Automatic ISO-Format card dispenser

- Dispensing of all ISO-Format cards
  Paper and plastic cards from 0,2 bis 0,8 mm thickness:
  - with chip
  - with magnetic track.
- Management of sales statistics.
- Payment with coins and/or banknotes according to the model.

Cartadis CD20 and CD30

Statistics

Cash checking is obtained from sales statistics. The person in charge of the unit may read out the receipts and the number of cards sold directly on dispenser display. The serial link RS232 enables a print out copy of these statistics on an optional **CARTADIS** printer.

Settings

Several programming keys are accessible inside the **Cartadis CD20/CD30**. They enable to both define the sale price of the cards to dispense and the list of the coins and banknotes accepted. The unit is fitted with a proven dispensing system which enables paper cards (**CD20**) and plastic cards (**CD30**) to be dispensed.
